

MBARARA UNIVERSITY OF SCIENCE AND TECHNOLOGY
FACULTY OF COMPUTING AND INFORMATICS
DEPARTMENT OF SOFTWARE ENGINEERING

COURSE NAME: client server programming for applications

ASIGNMENT: Project concept

No.	Full Name	RegNumber
1	MURUNGI KEVIN TUMAINI	2023/BSE/094/PS
2	AINAMAANI ALLAN MWESIGYE	2023/BSE/151/PS
3	MBABAZI PATIENCE	2023/BSE/079/PS
4	ARINDA JORDAN	2023/BSE/024/PS
5	ARIMU MARIAM	2023/BSE/021/PS
6	MWUNVANEEZA GODFREY	2023/BSE/100/PS
7	KIHAGAMA ISMAEL	2023/BSE/065/PS
8	OCHWO DENIS	2023/BSE/164/PS

Bank Loan Application System

Client-Server Architecture Overview

The Bank Loan Application System is a client-server application that mimics a bank's loan application process. An applicant submits and tracks a loan application from a mobile app, while bank staff review, verify, and approve or reject applications from a web dashboard on their PCs. The backend exposes a common API that both clients consume and persists all application data in a relational database.

Technology Stack

Component	User	Language / Technology
Mobile Client	Applicant	Kotlin (Android)
Web Client	Bank Staff	React JS
Backend / API	Server side	Java (Spring Boot)
Database (DBMS)	storage	PostgreSQL
